

Project Update

Weekly Update

July 5, 2011

We continue with construction! We have over 40,000 foot of innerduct installed and had an additional contractor start this past week. Schatz Underground Inc. started installing innerduct in the California area. More information about the Schatz team is below. We have also released a new video this week. Gary Hamilton, one of our project coordinators, shot some footage of the initial start of construction and put together a really nice video. You can check out this video at a link below. If you have questions or would like more information, please let us know.

Schatz Underground, Inc.

In this publication, we have been trying to highlight our bid winners. These groups are instrumental in this project and quality work will help us complete this project on time. One group who is working to install the innerduct along the Sho-Me MO route is Schatz Underground, Inc. Schatz is located in Nixa, MO. They work with numerous utility entities to provide construction for fiber optics, telephone lines, and power feeds, as well as water infrastructure. Sho-Me has a long history with this organization and we are confident in their abilities. They are currently working in the territories of both California and Linn. Schatz was awarded this project on Bid SMM012.

Sho-Me YouTube Account

We want to share our journey as we build the Sho-Me MO network. Our goal is to make it easy for you to follow along with us through our website posts, our social media accounts such as [Facebook](#) and [Twitter](#), and this newsletter, and now you will be able to follow the project on our new YouTube channel. We don't have a lot out there right now, but we hope to add more to our channel as this project progresses. As stated above, our very own Gary Hamilton did a great job of putting together a short video that shows the start of project construction. To check out this video, please check [here](#). We hope you enjoy.
